

Signal Mountain Police Department.

Post Event Traffic Plan for July 4th Fireworks

* In past years parking has been allowed along the west shoulder of James Boulevard, adjacent to the golf course. This WILL be allowed this year, but **vehicles must stay off of the sidewalk.** Vehicles should be parked facing south (towards Old Town).

When the fireworks end:

James Boulevard will be closed to thru traffic between Timberlinks Drive and Laurel Street.

Vehicles parked along this section of James Boulevard should exit to the south.

Vehicles exiting from the parking lots of the Country Club and Althaus Park area will be directed to turn North or South based on traffic flow at that time. Drivers must turn as directed by the police officer.

There will be two police officers directing traffic at the intersection of James Blvd., Texas Avenue and Timberlinks Drive.

There will be two police officers directing traffic at the exit from the Country Club

There will be one police officer directing traffic at the intersection of James Blvd. and Laurel Street.

The map on the following page illustrates the area to be closed to thru traffic, available detour routes around this area, location of traffic control officers and some of the areas available for parking.

Expect at least 30 minutes for traffic to return to normal conditions. We appreciate your patience as we do our best to accommodate your safe departure. We suggest that you take your time getting back to your vehicles. This will reduce the traffic flow, get cars out more effectively, and hopefully prevent crashes due to impatience.

Have a Safe and Happy 4th of July !!!
